Involving the removal or likely disturbance of asbestos

<table>
<thead>
<tr>
<th>What:</th>
<th>Painting a pre 1980's house with known asbestos in the eaves</th>
</tr>
</thead>
<tbody>
<tr>
<td>Where:</td>
<td>At an old residence in a suburban street</td>
</tr>
<tr>
<td>Who:</td>
<td>Typically involving one painter with the supervisor off site.</td>
</tr>
</tbody>
</table>

#### 1. ELIMINATION
- Have suspect materials tested prior to commencing work
- Engage an asbestos removalist to remove the asbestos prior to undertaking any painting work
- Suspend painting work while asbestos is being removed or likely to be disturbed

#### 2. MODIFICATION
- Work in areas away from and do not disturb the asbestos
- Wash and wipe the surface only, do not sand.
- Paint over the top and do not disturb.

#### 3. ADMINISTRATION
- Follow SWMS of Principle Contractor in regards to the work in there is a risk of falls
- Consult the asbestos register for the site to identify if any painting activities are likely to disturb any asbestos materials

#### 4. PERSONAL PROTECTION
- Wear required PPE
- Work in areas away from and do not disturb the asbestos
- Wash and wipe the surface only, do not sand.
- Paint over the top and do not disturb.
